

Bureau of Justice Statistics Bulletin

December 2007, NCJ 220218

Probation and Parole in the United States, 2006

Lauren E. Glaze
and Thomas P. Bonczar
BJS Statisticians

The number of adult men and women in the United States who were being supervised on probation or parole at the end of 2006 reached 5,035,225, up from 3,757,282 on December 31, 1995. These data were collected in the Bureau of Justice Statistics' (BJS) 2006 Annual Probation Survey and 2006 Annual Parole Survey.

Probationers are criminal offenders who have been sentenced to a period of correctional supervision in the community in lieu of incarceration. Parole is a period of conditional supervised release following a prison term.

In 2006 the combined probation and parole populations grew by 1.8% or 87,852 persons. The growth in 2006 was slower than the average annual increase of 2.2% since 1995. Over the past 11 years, the total population under community supervision increased by over 1 million offenders, based on comparable reporting agencies. It excludes 236,014 probationers under the supervision of agencies added since 1995. (See *Methodology*.)

More than 8 in 10 offenders under community supervision were on probation at yearend 2006

About 84% of the community supervision population was on probation at yearend 2006. Since 1995 (82%) the proportion of offenders on probation increased as a percentage of the total community supervision population.

During 2006 the probation population grew by 1.7% which represented an increase of 70,266 probationers. This was the largest growth since 2002 when the population increased 2.3% or 92,336 probationers.

Annual probation population and entries to probation, 1995-2006

Figure 1

Probation population grew by 923,100 persons since 1995

The probation population increased from 3,077,861 in 1995 to 4,237,023 in 2006 (figure 1). Based on comparable reporting agencies from 1995 to 2006, the probation population grew by 923,100 persons or 30%.

Between 1995 and 2006 the number entering probation supervision exceeded the number exiting and the probation population continued to grow. Entries increased from 1.6 million in 1995 to 2.3 million in 2006. Exits rose from 1.5 million to 2.2 million during this same 11-year period. Both entries and exits increased an average of 3.4% annually between 1995 and 2006.

Nearly a quarter of probationers who entered supervision during 2006 received a probation sentence combined with incarceration

Seventy percent of the estimated 2.3 million probationers who entered supervision during 2006 were sentenced to probation without a term of incarceration. Nearly a quarter of probationers received a combined probation and incarceration sentence.

Indiana reported detailed data for type of entry in 2006, but not in 2000. Based on comparable reporting methods in 2000 and 2006, almost 8 in 10 probationers entered supervision without incarceration while 1 in 6 received a sentence to probation combined with incarceration in both years.

Type of entry	Percent of adults entering probation		
	2000	2006	
		Reported	Comparable
Without incarceration	79%	70%	78%
With incarceration	16	24	16
Other types	5	6	6
Total estimated entries	2,153,300	2,272,300	2,272,300

Nearly 1 in 5 probationers who exited from supervision in 2006 were incarcerated

Since 2000 the total estimated number of probationers exiting supervision annually increased from 2,095,200 to 2,201,800 in 2006 (table 1). During this same time, the percentage of probationers who completed their full-term sentence or were discharged early declined, from 60% in 2000 to 57% in 2006.

Eighteen percent of probationers who exited supervision during 2006 were incarcerated. Nine percent were incarcerated due to a rule violation and 4% were incarcerated because of new offense.

Type of exit	Percent of adults exiting probation	
	2000	2006
Completions	60%	57%
Incarceration	15	18
With new sentence	3	4
With the same sentence	8	9
Other/Unknown	4	5
Absconder	3	4
Discharge to custody, detainer, or warrant	1	1
Other unsatisfactory	11	12
Death	1	1
Other	9	6
Total estimated exits	2,095,200	2,201,800

Over 7.2 million persons on probation or parole or incarcerated in jail or prison at yearend 2006

During 2006 the total Federal, State, and local adult correctional population — incarcerated or in the community — grew by 159,500 persons to over 7.2 million. The growth of 2.3% during the year was about the same as the average annual increase in the correctional population since 1995 (2.5%). About 3.2% of the U.S. adult population, or 1 in every 31 adults, were incarcerated or on probation or parole at yearend 2006.

Since 1995 the jail population was the fastest growing correctional population, with an average annual increase of 3.8%, followed by prison (3.0%), probation (2.4%), and parole (1.5%). Based on data from comparable reporting agencies, between 1995 and 2006 the correctional population increased by over 1.6 million offenders or 31%. Probationers accounted for more than half (57% or 923,100 offenders) of the growth. As a percentage of the correctional population, offenders under community supervision accounted for 69% of the total in 2006, while those incarcerated accounted for 31%. These percentages were almost unchanged from 1995 (70% and 30%, respectively).

Number of persons under correctional supervision, 1995, 2000-06

Year	Total estimated correctional population ^a	Community supervision		Incarceration	
		Probation	Parole	Jail	Prison
1995	5,342,900	3,077,861	679,421	507,044	1,078,542
2000	6,445,100	3,826,209	723,898	621,149	1,316,333
2001	6,581,700	3,931,731	732,333	631,240	1,330,007
2002	6,758,800	4,024,067	750,934	665,475	1,367,547
2003	6,883,200	4,073,987	774,588	691,301	1,390,279
2003 (revised) ^b	6,924,500	4,120,012	769,925	691,301	1,390,279
2004	6,995,100	4,143,792	771,852	713,990	1,421,345
2005	7,051,900	4,166,757	780,616	747,529	1,448,344
2006	7,211,400	4,237,023	798,202 ^c	766,010	1,492,973
Percent change, 2005-2006	2.3%	1.7%	2.3%	2.5%	3.1%
Average annual percent change, 1995-2006 ^d	2.5%	2.4%	1.5%	3.8%	3.0%

Note: Counts of probationers, parolees, and prisoners are for December 31. All jail counts are for June 30. Jail and prison counts include inmates held in private facilities. Totals in 2005 and 2006 exclude probationers and parolees held in jail or prison. Totals in 2000 through 2004 only exclude probationers held in jail or prison.

^aBecause some offenders may have multiple statuses, totals were rounded to the nearest 100.

^bDue to changes in reporting, total probation and parole counts include estimated counts for Massachusetts, Pennsylvania, and Washington based on reporting methods comparable to 2004.

^cIllinois did not provide data for 2006; therefore, all data for Illinois were estimated. See *Methodology* for more details.

^dPercent change is based on comparable reporting agencies, excluding 236,014 probationers from agencies added since 1995. See *Methodology*.

Note: Because of nonresponse or incomplete data, the probation population for some jurisdictions on December 31, 2006, does not equal the population on January 1, plus entries, minus exits. Rates were computed using the estimated adult resident population in each state on January 1, 2007. See *Methodology*.

**Not known.

^aDetails may not sum to totals because of rounding.

^bSome or all detailed data were estimated.

^cData for entries and exits were estimated for non-reporting agencies. See *Methodology*.

^dDue to a change in reporting, data are not comparable to previous years.

^eCounts include private agency cases and may overstate the number of persons under supervision.

^fCounts include estimates for misdemeanors based on admissions.

5 States accounted for over half of the growth in the probation population during 2006

Five States had an absolute increase of 4,500 or more in their probation population during 2006. California experienced the largest increase (13,400), followed by Minnesota (8,400), Alabama (7,200), Colorado (6,600), and Pennsylvania (4,700). These same 5 States accounted for 57% of the growth in the population during the year.

State	Absolute increase of 4,500 or more*	Percent of absolute increase, 2006
U.S. total	70,266	100%
Total	40,275	57
California	13,447	19
Minnesota	8,411	12
Alabama	7,159	10
Colorado	6,594	9
Pennsylvania	4,664	7

*Excludes Georgia which included probation case-based counts for private agencies, and Idaho which estimated misdemeanors based on admissions.

Majority of probationers were male and white

At yearend 2006, 76% of probationers were male, down from 79% in 1995 (table 2). Since 1995 women have accounted for a larger percentage of the probation population (21% in 1995 compared to 24% in 2006).

The racial composition of the probation population has remained nearly stable since 1995. In both 1995 (53%) and 2006 (55%) the majority of probationers were white. Twenty-nine percent were black in 2006, nearly unchanged from 31% in 1995. Hispanic probationers comprised 13% of the population in 2006; 14% in 1995.

More than 7 in 10 probationers were non-violent offenders

Nearly three-quarters (73%) of probationers under supervision on December 31, 2006 were supervised for a non-violent offense, including more than a quarter for a drug law violation and a sixth for driving while intoxicated. Sixteen percent of probationers were convicted of a violent offense, including 3% for sexual assault, 4% for domestic violence, and 9% for assault other than domestic violence and sexual assault. Eleven percent of probationers were supervised for other unspecified offenses.

Parole population grew by 17,586 during 2006

At yearend 2006 a total of 798,202 adult men and women were on parole or mandatory conditional release following a prison term (table 3). The population grew by 17,586 parolees during the year or 2.3%. This was greater than the average annual increase of 1.5% since 1995.

Note: Because of nonresponse or incomplete data, the parole population for some jurisdictions on December 31, 2006, does not equal the population on January 1, plus entries, minus exits. Rates were computed using the estimated adult resident population in each State on January 1, 2007. See *Methodology*.

**Not known.

:Not calculated.

^aDetails may not sum to totals because of rounding.

^bIncludes an estimated 34,900 parolees under supervision in Illinois on December 31, 2006.

^cSome or all data were estimated.

^dData for entries and exits were estimated for nonreporting county agencies. See *Methodology*.

^eExcludes parolees in one of the following categories: absconder, out of State, inactive, or only have financial conditions remaining.

^fParole population on January 1, 2006, was estimated from the number reported for December 31, 2005. See *Methodology*.

^gDue to a change in recordkeeping procedures, data were not comparable to previous reports.

At yearend 2006, 352 persons per 100,000 adult residents were under parole supervision. This represented 1 in every 284 adults in the United States. Arkansas had the highest rate of parole supervision at yearend 2006 (863 per 100,000), surpassing Pennsylvania (791 per 100,000) which had the highest rate of parole supervision since 1997. Maine had the lowest rate of parole supervision in 2006 (3 per 100,000).

Parole population increased in 36 States

The Federal System, 36 States, and the District of Columbia had more adults on parole at the end of 2006 than at the beginning of the year. Double-digit increases were reported in 14 States, led by North Dakota (up 23%) and Rhode Island (up 21%).

A total of 13 States had a decrease in their parole population during 2006. Double-digit decreases were found in Oklahoma (down 29%), Virginia (down 12%), and South Carolina (down 11%).

Parole entries outpaced exits during 2006

The State parole population reached 708,764 at yearend 2006, an increase of 15,000 parolees (or 2.2%). This was greater than the 10,200 average annual increase (1.5%) that occurred between 2000 and 2006.

During 2006 entries to State parole supervision (3.0%) outpaced exits (2.4%). However, between 2000 and 2006 entries (1.9%) and exits from State parole (1.8%) grew at about the same pace each year on average.

Year	State entries	State exits
2000	441,600	432,200
2001	445,600	439,100
2002	436,300	420,000
2003	459,100	440,500
2004	469,500	467,100
2005	479,800	468,900
2006	494,300	480,000
Percent change, 2006	3.0%	2.4%
Average annual percent change, 2000-06	1.9%	1.8%

Mandatory releases from prison made up half of all entries to parole supervision during 2006

Of the 536,200 parolees who entered parole supervision during 2006, more than half entered through a mandatory release from prison. Since 2000 (54%) mandatory releases to parole have decreased slightly.

Thirty-five percent of parolees who entered supervision in 2006 received a discretionary release from prison by a parole board decision. Discretionary releases to parole have decreased since 2000 (37%).

Between 2000 and 2006 reinstatements to parole increased as a percentage of all entries (6% and 9%, respectively).

Type of entry	Percent of adults entering parole	
	2000	2006
Discretionary parole	37%	35%
Mandatory parole	54	52
Reinstatement	6	9
Other	2	3
Total estimated entries*	470,400	536,200

*Includes offenders on State parole and Federal post-custody release.

*Excludes persons of Hispanic origin.

Percentage of parolees who completed their full-term sentence or exited parole early has remained stable since 2000

Forty-four percent of the estimated 519,200 parolees who exited supervision during 2006 completed their full-term parole sentence or were released from supervision early. Since 2000 this proportion has remained stable (43% in 2000).

In both 2000 and 2006, about 4 in 10 parolees exited supervision because they were returned to incarceration for a new offense or a technical violation. In the same two years, about 1 in 10 parolees exited supervision because they had absconded. Another 2% who exited in 2000 and 2006 had their parole sentence terminated unsatisfactorily.

Type of exit	Percent of adults exiting parole	
	2000	2006
Completions	43%	44%
Returned to incarceration	42	39
With new sentence	11	11
With revocation	30	26
Other/Unknown	1	2
Absconder	9	11
Other unsatisfactory	2	2
Transferred	1	1
Death	1	1
Other	2	3
Total estimated exits	459,400	519,200

Since 1995 the percentage of female and white parolees has increased

At yearend 2006 about 1 out of every 8 adults on parole was a woman (96,200) (table 4). Women represented a greater percentage of the parole population in 2006 (12%), compared to 1995 (10%).

The percentage of parolees who were black dropped to 39% in 2006, continuing a decline from 45% in 1995. Whites constituted 41% of the parole population in 2006, up from 34% in 1995. Almost 1 in 5 parolees were Hispanic (146,200). About 2% of parolees were of other races (12,500).

Nearly 4 in 10 parolees served a sentence for a drug offense

About 94% of all parolees at yearend 2006 had been sentenced to 1 year or more in Federal or State prison. The largest percentage of parolees had been convicted of a drug offense (37%, down from 40% in 2002). Data on type of offense were first collected in 2002.

At yearend 2006 about one in four parolees had been convicted of a violent offense or a property offense. In 2006, 6% of parolees had been convicted of a public order offense and 6% of another type of offense which was not classified.

Type of offense	Percent of parolees	
	2002	2006
Violent	24%	26%
Property	26	24
Drug	40	37
Public order	...	6
Other*	10	6

Note: 2002 was the first year data for type of offense were collected. Detail may not sum to total because of rounding.

...Not available.

*In 2002 public order offenses were reported among other offenses.

1 in 6 persons under parole supervision during 2006 were returned to incarceration

Of the 1,151,203 adult parolees at-risk of re-incarceration during 2006 in the 46 jurisdictions that provided information, 16% (179,259) were re-incarcerated (table 5). Offenders at risk of re-incarceration were defined as adults on parole on January 1, 2006, and those released to parole supervision during the year. In the 46 jurisdictions that provided information, a total of 665,321 parolees were under supervision on January 1, 2006, and 485,882 were released to parole supervision during the year. An unknown number of the 165,642 parolees at-risk in 7 other jurisdictions during 2006 were re-incarcerated.

More than 2 in 5 parolees known to have been returned to incarceration during 2006 were in California (78,721). New York (11,548) and Texas (10,661) each returned more than 10,000 parolees to incarceration. California, New York, and Texas together accounted for more than half of all adult parolees re-incarcerated during 2006 (56%).

6 States returned 20% or more of their at-risk population to incarceration

Utah and California each returned to prison or jail more than a quarter (28%) of their offenders who were under parole supervision at some time during 2006. The offenders were returned either as a result of a technical violation of their conditions of supervision or as a result of a new offense. Colorado and Missouri each returned 24% of their at-risk population during 2006; Kentucky and Minnesota each returned 21%. Of the States that provided information, four reported having returned less than 5% of their at-risk population to incarceration during 2006, including North Carolina and Maine (each 3%), Idaho (less than 0.5%), and Virginia (0%).

Rates of return to incarceration have remained stable since 1998

From 1998 to 2006, the percentage of offenders under parole supervision who were known to have been returned to incarceration remained relatively stable (figure 2). Data on type of exit from parole collected prior to 1998 are not consistent with 2006.

The percentage of the at-risk population returned to incarceration as the result of a revocation also remained stable (11% in each year). In 2006 approximately 5% of the at-risk population had been returned to incarceration for a new offense, unchanged from 1998.

Percentage of at-risk State and Federal parole population returned to incarceration, 1998-2006

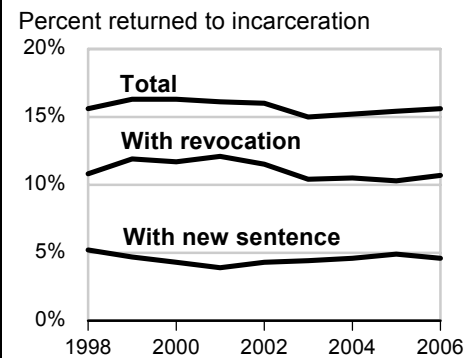

Figure 2

--Less than 0.5%.

^aIncludes 665,321 adults on parole on January 1 and 485,882 who entered parole between January 1 and December 31, 2006; see table 3.

^bExcludes an estimated 165,642 at risk of re-incarceration for which the total returned during 2006 was not reported, including Connecticut (5,416), Pennsylvania counties (estimated at 65,133), Illinois (estimated at 70,476), Delaware (967), Alaska (1,678), New Mexico (4,481), and Washington (17,491). See *Methodology*.

^cExcludes persons who may have been returned to incarceration but were reported as unsatisfactory (8,400), absconder (51,500), other (71,796), or unknown (5,046); see appendix table 1. May also exclude some persons reported as having completed parole for whom outstanding warrants were executed immediately upon exit from parole.

Methodology

Beginning in 1980 the Annual Probation Survey and Annual Parole Survey collected data on the total number of persons supervised in the community on January 1 and December 31 of each year and on counts of the number persons entering and exiting supervision during the year. These surveys cover the Federal System, all 50 States, and the District of Columbia. BJS depends entirely upon the voluntary participation of the State central reporters and the separate State, county, and court agencies for the annual probation and parole data.

In 2006 the U.S. Census Bureau served as the Bureau of Justice Statistics' (BJS) collection agent, except for the Federal system. Data for the Federal system were provided directly to BJS through the BJS Federal Justice Statistics Program which obtained data from the Office of Probation and Pretrial Services, Administrative Office of the United States Courts.

Because many States update their population counts, the January 1, 2006, numbers may differ from those previously published for December 31, 2005.

Probation

The 2006 Annual Probation Survey was sent to 463 respondents — the Federal System, 33 central State reporters, the District of Columbia, and 428 separate State, county, or court agencies. States with multiple reporters were Alabama (3), Arizona (2), Colorado (8), Florida (41), Georgia (5), Idaho (2), Kentucky (3), Michigan (128), Missouri (2), Montana (4), New Mexico (2), Ohio (185), Oklahoma (3), Pennsylvania (2), Tennessee (3), Washington (33), and West Virginia (2).

Since 1995 the survey coverage has been expanded to include 175 additional local agencies in Ohio (131), Florida (27), Washington (11), Montana (3), Kentucky (2), and Idaho (1). The majority of agencies (161) were added in 1999. At yearend 2006, 236,014 probationers were under the supervision of the 175 local agencies added since 1995.

Parole

The 2006 Annual Parole Survey was sent to 54 respondents, including 52 central reporters, the California Youth Authority, and 1 municipal agency. States with multiple reporters were Alabama (2) and California (2). One State, Illinois, did not provide data. See *Imputing entries and exits for non-reporting agencies* for more details.

Federal parole as defined here includes supervised release, parole, military parole, special parole, and mandatory release.

Imputing entries and exits for non-reporting agencies

Entries were imputed for non-reporting agencies using one of four methods, depending on data availability. The first method estimated entries to probation by applying the ratio of entries to the January 1 population in a recent year to the January 1, 2006, population for the same agency. Exits were estimated by adding the estimated entries to the January 1, 2006, population and subtracting the December 31, 2006, population. This method was used to estimate probation entries and exits for non-reporting agencies in Arizona, Colorado, Florida (four agencies), Georgia, Illinois, Kentucky, Michigan (the State agency), Montana, New Mexico, and Pennsylvania counties. This method was also used to estimate parole entries and exits for Pennsylvania counties.

A second method was used for Illinois which did not report on its parole population for 2006. Both the ratio of entries to the January 1 population and the ratio of exits to the January 1 population were estimated for 2006 from parole data provided by Illinois for 2005. These ratios were applied to number on parole in Illinois on January 1, 2006, (estimated from the count on December 31, 2005). The December 31, 2006, parole population was estimated by adding the estimated number of entries and subtracting the estimated number of exits from the January 1, 2006, parole population.

The third method estimated entries to probation supervision for county and district agencies which did not report entries and exits but which provided an estimate of their December 31, 2006, probation population. The ratio of entries to the January 1, 2006, population among reporting agencies in the same State was used to estimate the number of entries for non-reporting agencies having similar numbers of probationers. Exits from probation supervision were estimated in the same manner as in the first method (above). This method was used to estimate probation entries and exits for non-reporting agencies in Florida (four agencies), Michigan (localities), Ohio, and Washington.

The fourth method was used to estimate entries for one State-level agency. The number of entries for a West Virginia agency was estimated using the ratio of entries to January 1, 2006, population among reporting agencies within the same region. Exits for the non-reporting agency in West Virginia were estimated in the same manner as in the first method (above).

Estimating the adult resident population

Estimates of the adult resident population in each State on January 1, 2007, were generated by applying the July 1, 2006, ratio of persons 18 years or older to the January 1, 2007, resident population estimates within each State. The January 1, 2007, total resident population estimates were provided to BJS by the U.S. Census Bureau.

** Not known.

~ Not applicable.

^aIncludes parolees released from parole supervision who failed to meet all conditions of supervision, including some with only financial conditions remaining whose case may have been turned over to a business office, and other types of unsatisfactory exits; includes early terminations and expirations of sentence.

^bIncludes 51,500 parolees who had absconded (including 45,160 in California), 4,884 who had died, 2,766 who had transferred to another jurisdiction, and 12,646 others.

^cSome or all detailed data are estimated.

^dNo data provided. An estimated 35,600 adults left parole supervision in Illinois during 2006. See *Methodology*.

Note: Counts for 1995, 2000, and 2005 are for January 1 and may have been updated from previously published yearend counts.

**Not known.

^aDue to a change in recordkeeping procedures, probation and parole counts for 2005 and 2006 are not comparable to previous years.

^bDue to expanded coverage, probation counts for 2000, 2005, and 2006 are not comparable to 1995.

^cProbation counts for 2000, 2005, and 2006 include private agency cases and may overstate the number under supervision.

^dProbation counts for 2000, 2005, and 2006 include estimates for misdemeanors based on admissions.

The Bureau of Justice Statistics is the statistical agency of the U.S. Department of Justice. Jeffrey L. Sedgwick is the director.

BJS Bulletins present the first release of findings from permanent data collection programs.

This Bulletin was written by Lauren E. Glaze and Thomas P. Bonczar. William J. Sabol and Heather Couture provided statistical verification. Christopher J. Mumola provided statistical review. Tina Dorsey edited the report, under the supervision of Doris J. James. Jayne E. Robinson prepared the report for final printing.

December 2007, NCJ 220218
