Dear Mr. Smith

As a specialist in forensic medicine, an NRA training counselor for personal protection, a law enforcement firearms instructor and physiologist, I have reviewed the technology and the medical literature concerning the ADVANCED TASER M-Series. Based on my review, I believe the technology is both safe and effective. The ADVANCED TASER provides an effective response to a threat without the use of lethal force, avoiding not only loss of life, but post traumatic stress syndrome and recovery. Non-Lethal Force presents a clear public relations plus as well. After my extended study of the literature and materials, I am pleased to endorse the ADVANCED TASER and its technology.

Thank you for your assistance in allowing me to review this product.

Sincerely,

Robert H. Goldberg, J.D., M.D.
