**ADVANCED TASER® M26 Wins Editor's Choice for "Best in Security" by French
"Cibles" Magazine at Paris' MILIPOL Trade Show**

SCOTTSDALE, AZ., November 21, 2001 - TASER International, Inc. (Nasdaq: TASR), a provider of advanced less-lethal weapons for use in the law enforcement, private security and personal defense markets, today reported it had won Cible Magazine's award for "Cible D'Or" as best security product in France. The award was presented to TASER International today during the MILIPOL Paris Exposition (military and police).

"I feel honored to received this award while attending today's MILIPOL. The Cible D'Or award comes on the heel of so many exciting company events during the past week. Although our product has been an overwhelming export success story in France for TASER International over the years, I did not expect the vaunted Cibles Magazine to present this to our company. It is a pleasant surprise and confirms that others are impressed with the ADVANCED TASER over the past year in France," said Rick Smith, Chief Executive Officer.

"With the recent commitment by United Airlines to arm their aircraft crews with the ADVANCED TASER M26 and our announcement that 1,000 law enforcement agencies are deploying the M26, this award could not have come at any better time. By attending the MILIPOL tradeshow, we are in the right place to expand our export program and to further develop our sales to law enforcement overseas. The response here is overwhelming at MILIPOL. Our booth is packed with interested law enforcement agencies and distributors. It is more than flattering to have many of these attendees comment so positively concerning the Cible D'Or award," continued Mr. Smith.

MILIPOL Paris, held November 20 – 23, 2001, at Paris-Le Bourget Exhibition Centre-France. MILIPOL Paris Exposition is the world leader of expositions devoted to security and anti-criminal technologies and a meeting point for all international decision-makers for public and industrial security.

About TASER International, Inc.

TASER International, Inc. provides advanced less-lethal weapons for use in the law enforcement, private security, and personal defense markets. Its flagship ADVANCED TASER® product uses proprietary technology to incapacitate dangerous, combative, or high-risk subjects that may be impervious to other less-lethal means. This technology reduces injury rates to suspects and officers, thereby lowering liability risk and improving officer safety. The ADVANCED TASER is currently in testing or deployment at over 1000 law enforcement and correctional agencies in the U.S. and Canada.
